***Priority***

Applicant's submission of translations of the foreign priority documents remove Kosugi et al. '913 as prior art.

**REASONS FOR ALLOWANCE**

While the use of radio wave transponders to power various devices (sensors, memory) of containers for holding printing fluid were known to the prior art (such as evidenced by Kubota '752 and other prior art) the prior art of record fails to provide a second electric power generator to generate a second electric power from a first electric power generated by a first electric power generator (claims 1-8) or a boosting circuit boosting a first electric power generated by a first electric power generator (claims 9-14). This improvement is seen to be useful and non-obvious over the cited prior art to supply sufficient power to different types of devices (sensors, memories) on print cartridges with efficiency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
